TERMS OF ACCEPTANCE

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working towards the same objective.
Chiropractic has only one goal. It is important that each patient understand both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

Adjustment: An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine.

Health: A state of optimal physical, mental, and social well being, not merely the absence of infirmity.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease. We only offer to diagnose either vertebral subluxations or neuro-musculoskeletal conditions. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of another health care provider.
Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. OUR ONLY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxations.

THERE WILL BE NO REFUNDS ON THE BASIS OF UNMET EXPECTATIONS!
REFUNDS WILL ONLY BE ISSUED FOR UNUSED PREPAID VISITS.

I, _____ have read and fully understand the above statements.
(please print your name)

All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction. I therefore accept chiropractic care on this basis.

PATIENT INFORMED CONSENT FORM

I understand that, under the Health Insurance Portability and Accountability Act of 1996 (HIPPA), I have certain rights to privacy regarding my protected health information. I understand that this information can and will be used to:

☐ · Conduct, plan and direct my treatment and follow-up among the multiple healthcare providers who may be involved in that treatment directly and indirectly.

☐ · Obtain payment from third-party payers.

☐ · Conduct normal healthcare operations such as quality assessments and provider of care certifications.

I have been informed of your *Notice of Privacy Practices* containing a more complete description of the uses and disclosures of my health information. I have been given the right to review such *Notice of Privacy Practices* prior to signing this consent. I understand that this facility has the right to change its *Notice of Privacy Practices* from time to time and that I may contact this facility at any time at the address above to obtain a current copy of the *Notice of Privacy Practices*.

I understand that I may request in writing that you restrict how my private information is used or disclosed to carry out treatment, payment or health care operations. □ **Informed Consent for Physical Therapy treatment**

The term "informed consent" means that the potential risk, benefits, and alternatives of physical therapy treatment have been explained to you. The therapist provides a wide range of services and I understand that I will receive information at the initial visit concerning treatment options available for my condition.

Potential risk: I may experience an increase in my level of pain or discomfort, or an aggravation of my existing injury or condition. This discomfort is usually temporary; if it does not subside in 24 hours, I agree to contact my physical therapist.

Potential benefits: I may experience an improvement in my symptoms and increase in my ability to perform daily activities.

I may experience decrease in pain and discomfort. I should gain a greater knowledge about managing my condition and the resources available to me.
